

Join us for a Briefing:

“How Hurricane Season Can Impact Fuel Supplies – An Examination of Critical Infrastructure”

April 27, 2:30 – 3:30 pm

2253 Rayburn House Office Building, Washington, DC

As hurricane season approaches, it’s important to be able to communicate to your constituents about the impact it can have on their daily lives – even if they do not live in a region affected by hurricanes. Every day, the American people consume 392 million gallons of gasoline, 155 million gallons of diesel fuel, and more than 45 million gallons of biofuels. Ensuring these fuels reach American motorists is of strategic importance to the nation’s economy, and hurricanes can have a big impact on how that system works.

Brought to you by the Fuels Institute, a non-profit, collaborative research organization, and featuring a panel of industry experts, “How Hurricane Season Can Impact Fuel Supplies – An Examination of Critical Infrastructure,” will help you understand how this complex system operates and why it’s such an important part of the American economy. We’ll help you understand:

- Refinery, pipeline and terminal operations and capabilities
- Renewable biofuels production and delivery
- Wholesale delivery and retail fuel availability
- Seasonal adjustments and market volatility
- Hurricane preparedness, responsiveness and resilience

Join us April 27, 2:30 – 3:30 in 2253 Rayburn House Office Building for a discussion that will be invaluable to those working on transportation and infrastructure-related issues. The event will feature the following experts:

- John Eichberger, Executive Director, Fuels Institute
- Randy Fralix, General Manager, U.S. Sales, Phillips 66
- Chuck Corr, Manager, Biofuels Technical Service, Archer Daniels Midland Company
- Ron Sabia, Board Member and former President, Gulf Oil

To RSVP or for questions, please contact John Eichberger at jeichberger@fuelsinstitute.org and visit FuelsInstitute.org/research to access the Fuels Institute report, “Assessing the U.S. Fuels Distribution Network”

About the Fuels Institute: The Fuels Institute, founded by NACS in 2013, is a 501(c)(4) non-profit research-oriented think tank dedicated to evaluating the market issues related to vehicles and the fuels that power them. By bringing together diverse stakeholders of the transportation and fuels markets, the Institute helps to identify opportunities and challenges associated with new technologies and to facilitate industry coordination to help ensure that consumers derive the greatest benefit. The Fuels Institute commissions and publishes comprehensive, fact-based research projects that address the interests of the affected stakeholders. Our research is independent and unbiased, designed to answer questions, not advocate a specific outcome.
